Executive Summary

Purpose

Describe the purpose of the project. What is the problem being solved? Why is the project important? Who might benefit from the project?

The main purpose of this project is to sell items. We sell Covid supplies commercially. The project is probably the number one thing people need currently. People are in need of masks, sanitizer, clean wipes and also vaccines for future. Since there are many real vaccines in development around the world. We will offer free shipping for the vaccines when they come out. Everyone in this world, be it a man or a dog can be prone to Covid can benefit from the project.

Synopsis

Briefly describe the project in big picture terms, like an elevator pitch. What will it do? Who is it for? Why does it matter? How will you solve the problem?

The whole world is in lockdown. No one can move around but with a covid vaccine. Anyone can breathe air like we used to in 2019. We sell released Covid vaccines because there are so many in development right now. We will offer lower process. It's for everyone. No age limits. We ought to send out supplies to every corner of the world and that is our goal. If one does not like vaccine made in China, one can opt for made in Russia instead. We will together tackle for the eradication of this life-threatening disease.

Background

Problem

State the problem again and provide more details about it, such as historical context, relevance, importance to your group, importance to a target audience, etc.

Every human being is in the state of lockdown. They need a Covid supplies to move freely. We want to deliver to their doorsteps free of cost. It all started back in December 2019. The world was embracing for New Year 2020. Knowingly unknowingly a life-threatening virus hit China which spread across every country on earth. Bringing down the whole pollution level to more than 50%. The world racing in developing vaccines. We hope to tackle this problem by providing necessary supplies to individuals, schools, offices, organizations, etc.
